Profile

Full-stack software developer with 4+ years delivering high-availability web applications in agile environments. Skilled in React, Java Spring, and Azure, with a proven record improving performance, reliability, and workflows. Recognized for system design and collaborative leadership.

Core Competencies

- Strong analytical and problem-solving abilities; self-starter mindset
- End-to-end systems thinker with attention to detail
- Advanced written, oral, and presentation skills
- Agile team leadership and cross-disciplinary collaboration

Key Skills

Languages: C#, C++, Python, Java, JavaScript/TypeScript, Kotlin, SQL (MS SQL Server, PostgreSQL, GraphQL)

Frameworks & Tools: React, Redux Toolkit, Spring Boot, Kafka, Node.js, Docker, Kubernetes, Unity, Flutter, WPF, Github Copilot

Cloud & DevOps: Azure, AWS (learning), Git, CI/CD, JIRA, SonarQube

Testing: Unit, Integration, API, E2E (ReadyAPI, Puppeteer)

Experience

Moneris — Software Developer II

Nov 2023 – Present | Toronto, ON

- Led a 4-person agile team to redesign and modernize a critical internal business application, improving uptime as reported from Azure application insights and metrics from 99.5% to 99.99% by migrating to Azure cloud.
- Contributed to large-scale enterprise applications in full-stack capacity, collaborating with senior developers and stakeholders to deliver evolving business requirements.
- Maintained 90%+ test coverage, reviewed code, and introduced coding standards to enhance consistency and developer experience.

Moneris — Software Developer I

Apr 2022 – Nov 2023 | Toronto, ON

- Sole developer of front-end rewrite project, creating a sustainable codebase with minimized technical debt.
- Increased API reliability 25%, reduced manual testing 90%, and cut production defects 30% through automated API testing.
- Improved API performance 50% via Redux Toolkit integration; supported and mentored interns/new hires.
- Promoted to Developer II in 18 months (vs. 24-month average).

Moneris — Software Developer Intern

2019 & 2021 | Toronto, ON

- Built Puppeteer E2E automation covering 90% of flows, reducing regression testing from 2 days to 2 hours.
- Advocated TypeScript adoption, preventing 5–10 potential issues per sprint found in metrics during sprint review; offered full-time role after internship

Projects

N2Engine (C++ Game Engine) | GitHub: <https://github.com/EpicNicks/N2Engine>

- Integration with Nvidia PhysX and OpenGL for physics and graphics rendering systems.
- Applied lessons from developing NEngine in C# to the architecture of N2Engine.

NEngine (C# Game Engine + Editor) | GitHub: <https://github.com/EpicNicks/NEngineEditor>

- Designed Unity-inspired object/component system for flexible, maintainable architecture.
- Built event-driven MVVM architecture WPF editor with content browser, inspector, and scene tools for 2D games.
- Enabled runtime property reflection; optimized update loop using SFML.NET.

Education

Bachelor of Computer Science (Specialized Honours) — Lassonde School of Engineering, York University, 2022

- Awarded academic entrance scholarship
- Hackathon participant

Certification: Microsoft Azure Fundamentals (AZ-900), 2022. Azure Administrator Associate (AZ-104 – in progress)
